## **OVERSEAS REGULATORY ANNOUNCEMENT ANNOUNCEMENT ON THE COMPLETION OF ON-GRID POWER GENERATION FOR THE FIRST QUARTER OF 2023**

### **SPECIAL NOTICE**

The board of directors and all directors of the Company warrant that there are no false representations and misleading statements contained in, or material omissions from this announcement, and severally and jointly accept the responsibility for the truthfulness, accuracy and completeness of the contents of this announcement.

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Datang International Power Generation Co., Ltd. (the “**Company**”) announces that, according to the Company’s preliminary statistics, as of 31 March 2023, the total on-grid power generation of the Company and its subsidiaries amounted to approximately 53.0609 billion kWh, representing a decrease of approximately 8.69% on a year-on-year basis, of which:

<b>Category</b>	<b>On-grid power generation for the first quarter of 2023 (billion kWh)</b>	<b>Year-on-year change</b>
Coal-fired	41.4959	-10.97%
Gas-fired	3.9214	22.82%
Hydropower	3.2150	-36.30%
Wind power	3.7073	33.01%
Photovoltaic	0.7214	51.30%
Total	53.0609	-8.69%

The major reasons for the change in on-grid power generation of the Company are:

1. As a result of the slowdown in the growth rate of electricity consumption of the whole society and the power demand in the region where the Company's coal-fired power units are located, the on-grid power generation from the coal-fired power units of the Company decreased significantly year-on-year;
2. In the first quarter, the water flow in the basin where the Company's hydropower stations are located was relatively dry, which resulted in a year-on-year decrease in the on-grid power generation from those hydropower stations;
3. As a result of the significant year-over-year growth in the hours of utilization of existing new energy units and continuous growth in the new energy installed capacity, the growth rate of wind power and photovoltaic on-grid power generation is significant.

As of 31 March 2023, the average on-grid tariff of the Company was RMB489.74 per MWh (tax inclusive), representing an increase of approximately 5.2% year-on-year. In the first quarter of 2023, the market-based transaction volume of electricity of the Company was approximately 45.7023 billion kWh, accounting for approximately 86.13% of the total.

Details of the on-grid power generation of the Company and its subsidiaries are set out as below:
