(a sino-foreign joint stock limited company incorporated in the People's Republic of China)

(Stock Code: 00991)

OVERSEAS REGULATORY ANNOUNCEMENT ANNOUNCEMENT ON THE COMPLETION OF ON-GRID POWER GENERATION IN THE FIRST THREE QUARTERS OF 2023

SPECIAL NOTICE

The board of directors and all directors of the Company warrant that there are no false representations and misleading statements contained in, or material omissions from this announcement, and severally and jointly accept the responsibility for the truthfulness, accuracy and completeness of the contents of this announcement.

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Datang International Power Generation Co., Ltd. (the “**Company**”) announces that, according to the Company’s preliminary statistics, as of 30 September 2023, the total on-grid power generation of the Company and its subsidiaries amounted to approximately 194.1649 billion kWh, representing an increase of approximately 4.32% on a year-on-year basis, of which:

Category	On-grid power generation for the first three quarters of 2023 (billion kWh)	Year-on-year change
Coal-fired	144.5224	3.50%
Gas turbine	14.9815	42.27%
Hydropower	21.8051	-15.36%
Wind power	9.9080	19.57%
Photovoltaic power	2.9480	53.93%
Total	194.1649	4.32%

The major reasons for the change in on-grid power generation of the Company include:

1. Affected by the year-on-year increase in the electricity demand of the whole society and the high temperature, the on-grid power generation of thermal power of the Company in the first three quarters recorded a year-on-year increase;
2. In the first three quarters, due to the shortage of water inflow in the drainage basin where the hydropower generation units of the Company are located, the on-grid power generation of hydropower recorded a year-on-year decrease, of which, in the third quarter, the water inflow improved year-on-year, and the overall decline in on-grid power generation of hydropower narrowed significantly compared to the first half of the year;
3. The clean energy installed capacity of the Company continued to increase, the utilization efficiency of existing units in certain regions improved, and the on-grid power generation of the clean energy units of the Company in the first three quarters recorded a larger year-on-year increase, which effectively offset the impact of the decrease in hydropower generation and positively drove the overall increase in on-grid power generation of the Company in the first three quarters.

As of 30 September 2023, the average on-grid tariff of the Company was RMB468.22 per MWh (inclusive of tax), representing an increase of approximately 1.91% year-on-year. In the first three quarters of 2023, the market-based transaction volume of electricity of the Company was approximately 163.0458 billion kWh, accounting for approximately 83.97% of the total.

Details of the on-grid power generation of the Company and its subsidiaries are set out as below:

Area	Category	Company name	On-grid power generation for the first three quarters of 2023 (billion kWh)	Year-on-year change
Beijing, Tianjin & Tangshan	Gas Turbine, Photovoltaic Power	Beijing Gao Jing Thermal Power Plant of Datang International Power Generation Co., Ltd.	4.1033	-0.10%
	Coal-fired	Dou He Power Plant of Datang International Power Generation Co., Ltd.	0.8359	-9.14%
